## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. oil phase comprising vegetable oils, mineral oils, aliphatic esters, aliphatic ethers, aliphatic alcohols, triglycerides, and aliphatic hydrocarbons;
- II. aqueous phase comprising moistening agents (glycerol, sorbitol, xylitol, glycols), alcohols (ethyl alcohol and propyl alcohol), fluorinated salts, sweetening substances (saccharine and aspartames), coloring substances, pH adjusters.

Applicant is required, in reply to this action, to elect a single species from each of Groups, I and II (oil phase and aqueous phase) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

- 1) An oil phase, as set forth in claims 1 and 6-10;
- 2) An aqueous phase, as set forth in claims 2-5 and 9-10.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the chemical compounds of claims 6-8, and claims 2-5 are not being regarded as being of similar nature because all the alternatives do not share a common structure and the alternatives do not belong to a recognized class of chemical compounds.
